RADIUS ARM SPACERS COMPATIBLE WITH NISSAN PATROL GQ & GU

This new 2 piece design features all the key features and benefits of preceding versions with the added benefit of offering both a 7.5mm & 15mm spacing option in the one kit. Utilising just kit1 allows for the maximum amount of spacing (7.5mm) before clearance issues arise on late model GU chassis's where the radius arm comes into contact with the panhard rod mount when using the larger spherical bush at almost full compression. Earlier GQ's & GU Coil cab models can use both kit1 & kit2 spacers combined offering maximum forward movement of the front diff (15mm).

(GU Patrol models with the spherical bush panhard can investigate modification to the panhard bracket and/or bump stop increase to provide clearance to potentially utilise the 15mm spacing where required.)

Part Number RASWNISV3

Radius Arm Spacers
